

# Volunteers Needed

## Join a paid study about Lyme disease during pregnancy.

We are looking for people who have been diagnosed with Lyme disease or post-treatment Lyme disease syndrome (PTLDS) within the past 5 years. If you join this study, we will monitor your pregnancy and your child's development during the first 18 months of their life.

### You may be eligible if you:

- ✓ Are pregnant
- ✓ Live in the United States or Canada
- ✓ Have been diagnosed with acute Lyme disease, chronic Lyme, or PTLDS

Please note: You do not need to live near Washington, DC to join.

### Participation includes:

#### Pregnancy

- Blood testing and imaging
- Questionnaires
- Optional interview about your experience

#### Delivery

- Analysis of your placenta

#### Your child's first 18 months

- Blood testing and imaging
- Questionnaires
- Tracking your baby's development
- Neurology appointments

### About our research:

- Free to join and participate
- You will be paid for your time
- Travel is NOT required!

**Help us learn how Lyme disease during pregnancy affects children and families.**
